# Zenith Metaplast

**Design**

**Develop**

**Deliver**

Zenith Metaplast (P) Limited is on the frontline of manufacturing, with facilities for Plastic Injection moulding, Sheet Metal, Soft Luggage and Aluminium Die Casting.

For the last 20 years, we have shipped Quality products across the world.

# Zenith

▮▮ Speed, Precision and Value. These are the cornerstones of our establishment.

**Venugopal B N**  
Managing Director  
Zenith Metaplast

Each individual at Zenith contributes to translating ▮▮ this into a reality everyday.

## Zenith Metaplast

From our beginning 20 years ago, we've been providing our customers with the finest products and a vast range of manufacturing options, at competitive prices. With competence in conceptual design, mould design and tooling, manufacturing, quality control, assembly and on-time delivery, our facilities and processes enable a turn-key approach to fulfill your specific requirements.

As an ISO 9001:2000 certified company, we are dedicated to supplying products of exceptional quality.

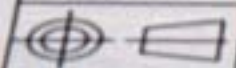

**Zenith Metaplast is well known for its manufacturing diversity.** We have facilities for sheet metal processing, die casting, plastic injection moulding, woodworking and soft luggage manufacturing that ensure total planning and inventory control. This is how we reduce turn-around time and costs.

**It's the reason we are one of the most capable and versatile manufacturers in the industry that provides the convenience of a one-stop service for our clients.**

DIM

Our design engineers set the process underway by ideating practical solutions, creating 3D component and tooling models and developing functional prototypes. We work with you in developing your final design or suggesting possible refinements that can result in substantial production savings.

The Zenith Design Team provides early design consultation to establish the superiority and manufacturability of your product, before designs are locked in. Our engineers are known to provide solutions that work efficiently without compromising the essence of the product.

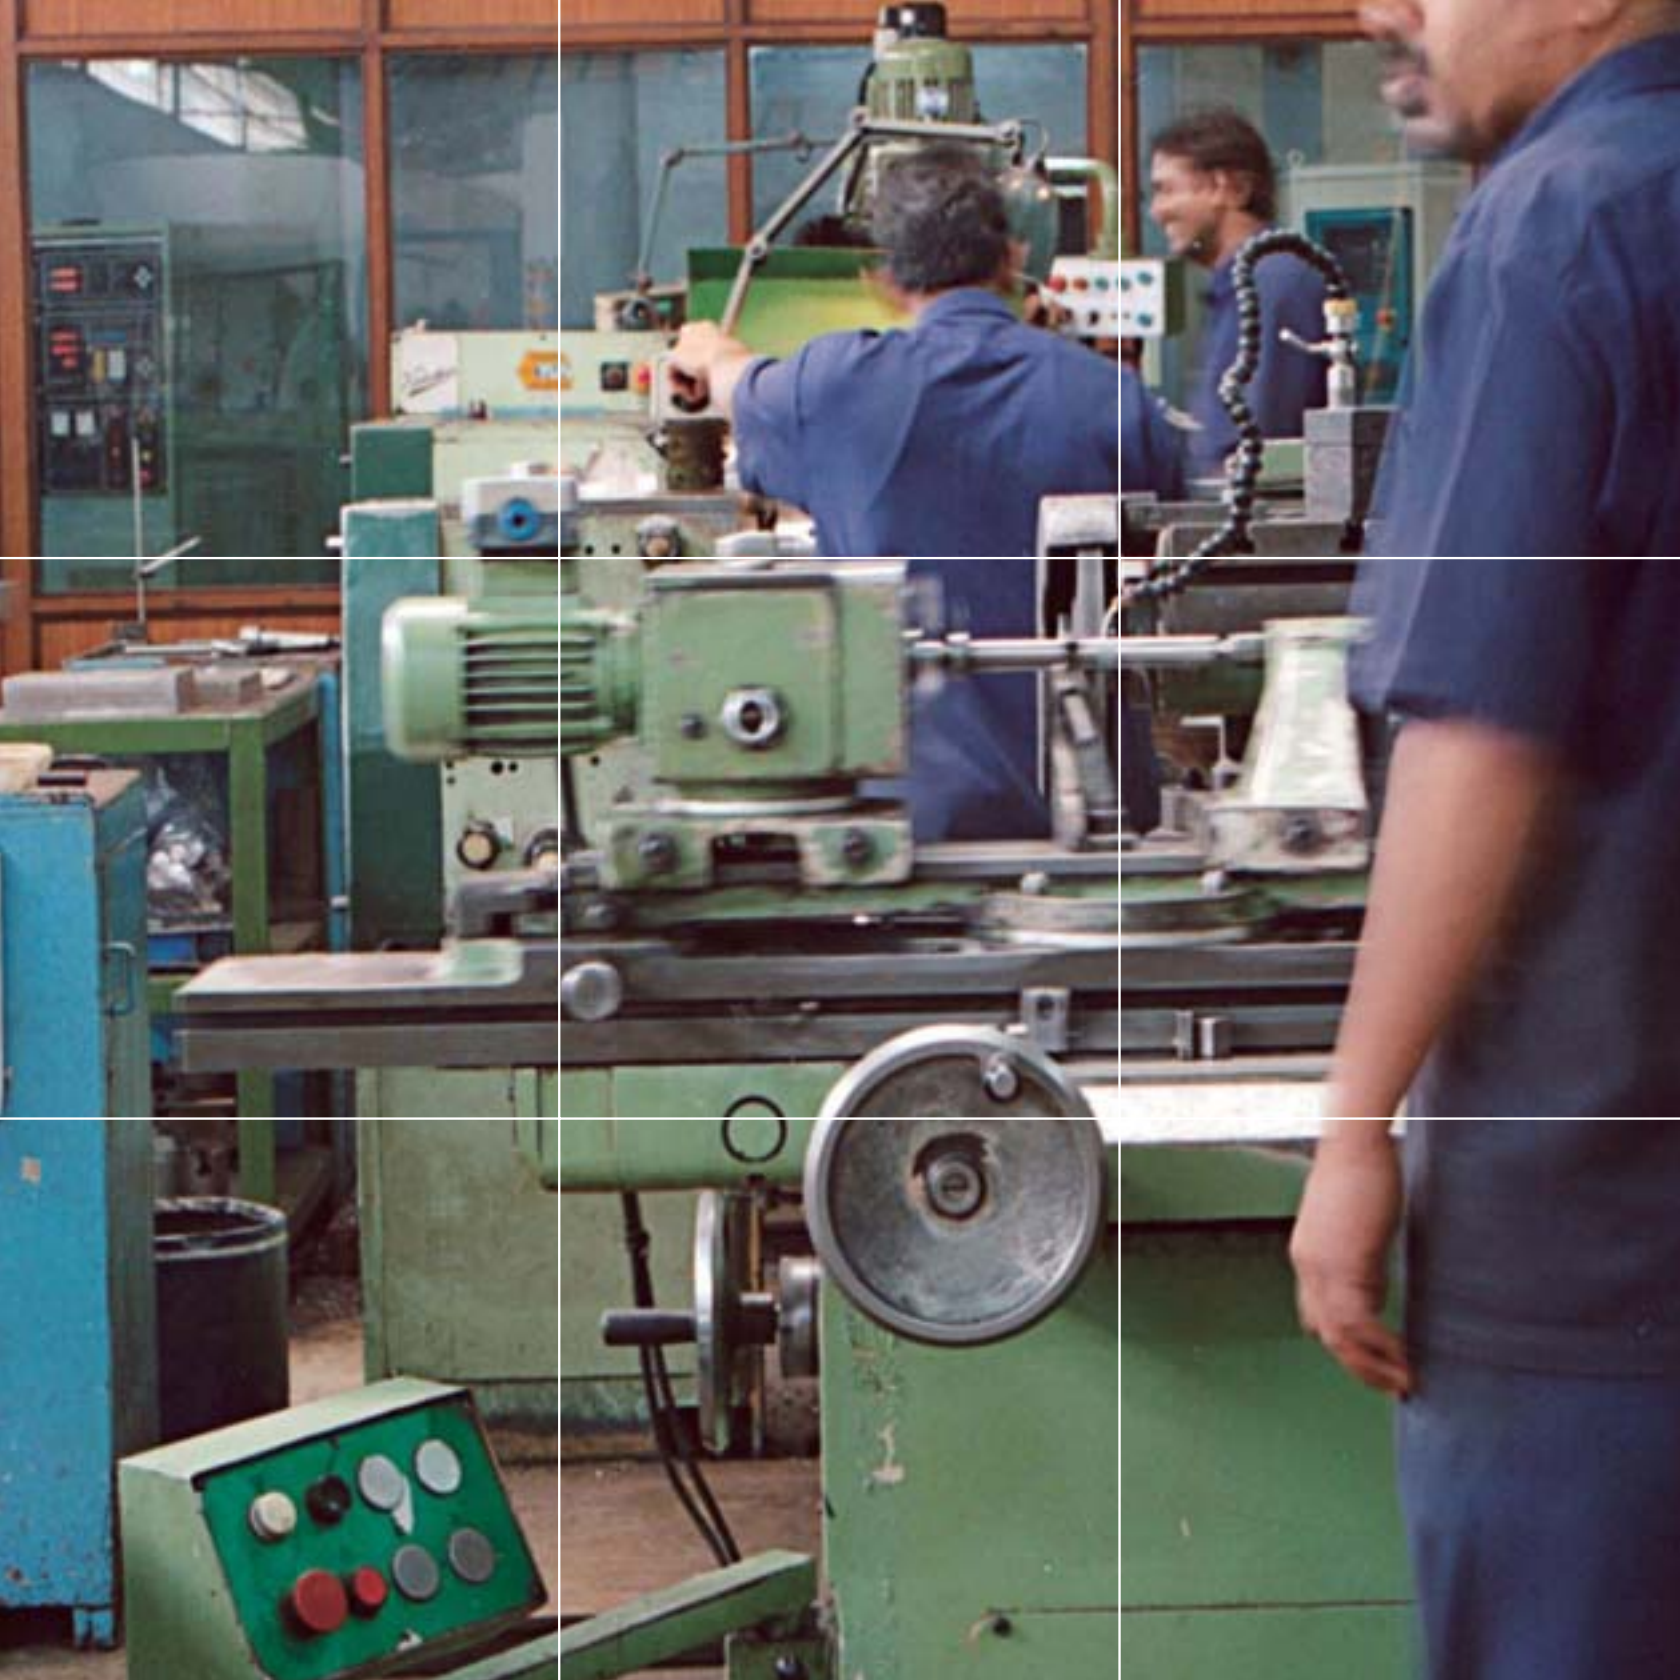

# Develop

Our experience and analysis inform the mould and tool designs we make, ensuring dimensional accuracy and functional consistency. Tooling lead-time is drastically reduced by directly applying 3D CAD model data to develop our tools.

Zenith Metaplast is proud of its experienced Design and Development team. Each die-maker works directly from 3D CAD data, ensuring precise data sharing and total control on the process. The team-oriented environment ensures delivery of quality tools in the shortest time required.

# Deliver

Zenith Metaplast has been delivering manufacturing solutions to many industry giants ranging from automotive to writing instruments manufacturers. Our area of expertise brings to you a unique combination of Metal, Wood and Plastic capabilities and subsequently their integration and assembly.

As all manufacturing is done in-house, we offer individual components, or fully integrated assemblies - whichever best suits your needs. We pack in conformity with any component packaging requirements, including consignment in your own cartons to locations you specify.

A close-up photograph of a white and dark grey plastic storage bin. The bin is divided into two sections: a white section on the left and a dark grey section on the right. The bin has a grid-like structure with horizontal and vertical ridges. The word "Quality" is written in a dark, serif font across the center of the image, overlapping both sections. The lighting is soft, highlighting the texture of the plastic.

Quality

Our approach to quality assurance involves a total management commitment among all operating departments, through all stages of our process, to prevent and eliminate defects.

Each of us is empowered with the responsibility to effect process improvement and continuous enhancement of production to implement our rigorous quality standards.

Our commitment to excellence has earned us the awards of the **'Green Certificate'** from Wal-Mart, **'Best Supplier'** for the last six consecutive years from **VIP industries**, **'Self-certified Supplier'** from BP Ergo.

## Zenith Metaplast is ISO 9001:2000 certified.

# Showcase

Zenith is proud of its legacy of craftsmanship and quality. We manufacture modular furniture to fit with modern working spaces. We have the infrastructure to make sheet metal and wooden furniture along with plastic, sheet metal and aluminium accessories.

ZENITH

# Showcase

We have developed innovative, high-quality products in various types of office cases, backpacks, travel cases and vanity cases. Development process for all components being integrated, the turnaround is quick and accurate.

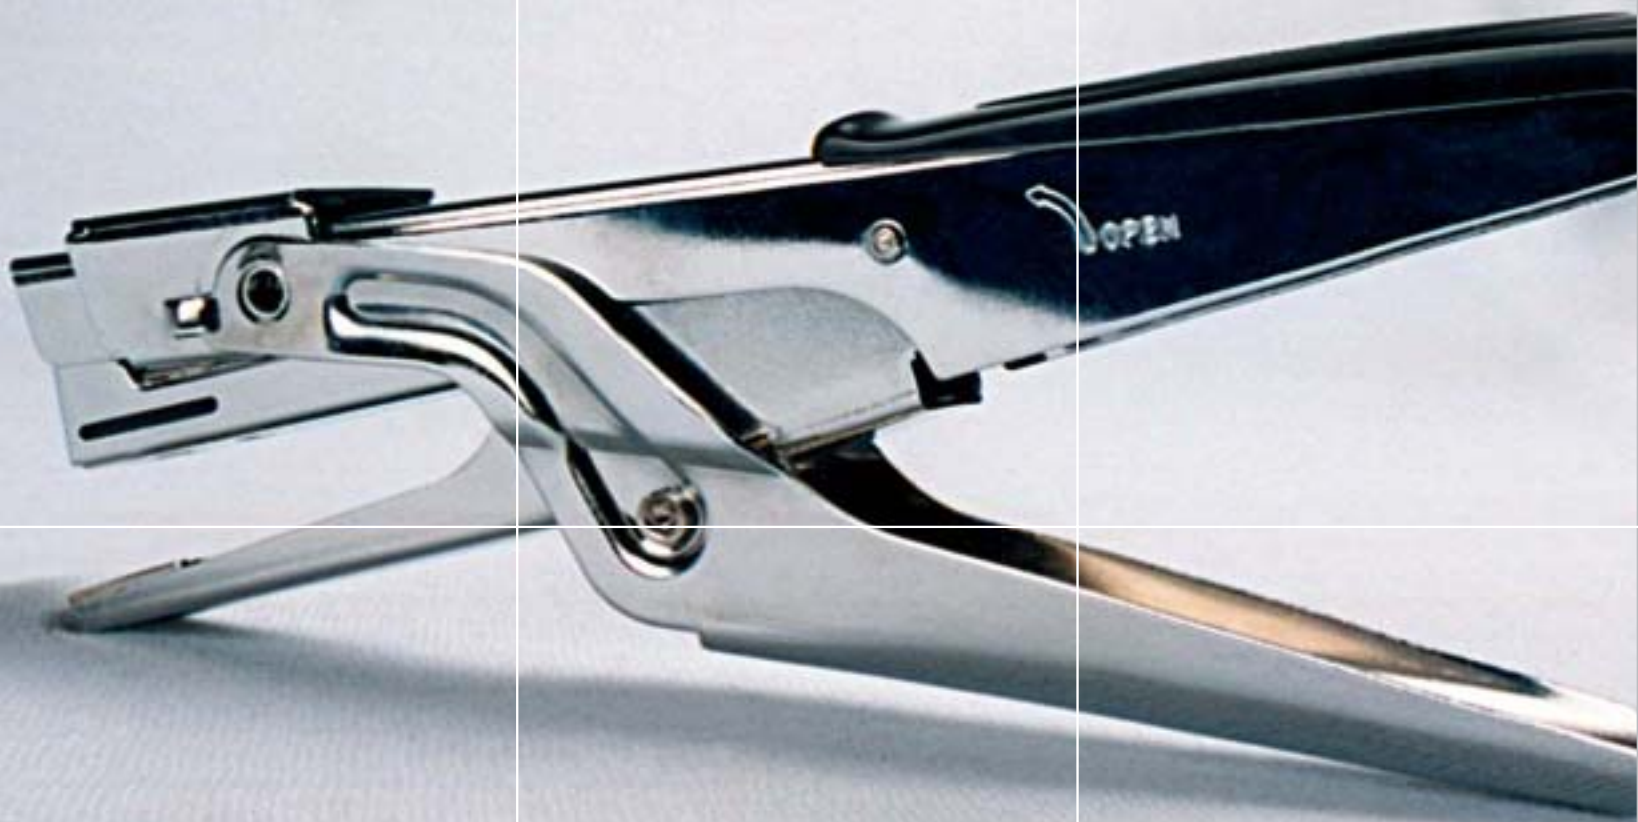

# Showcase

We manufacture office instruments with modern engineered plastics that are strong, light weight, and resistant to chemical corrosion, and come in a staggering range of colors and textures. The plating unit in our facility provides for a variety of finishes for metal parts. We house a dedicated assembly line to put together the best of office instruments in India. We have an inhouse design unit to cater to customer requirements.

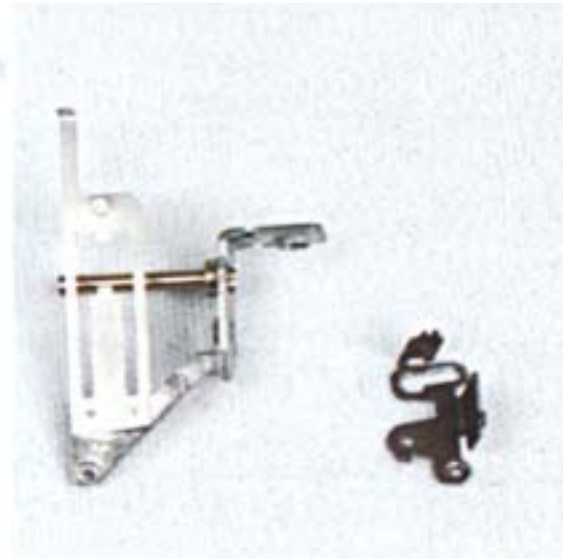

# Showcase

We specialise in the manufacture of precision components for the automotive and electrical components industries.

Our components are developed with highly strict quality standards in keeping with the Industry Standards that apply.

We have facilities for automated sheet metal processing and sub-assembly lines to deliver faultless components in record time.

Insight

## Speed

We at Zenith pride ourselves on our customer's confidence of being first time right in product development. As all manufacturing is done in-house, we have total control over schedules that ensure that our deliveries happen on the dot.

## Precision

Precision in design. In planning. In execution. Quality Assurance lies in the method we approach our work.

## Value

We combine our know-how from our diverse expertise to recommend design changes that can substantially reduce costs and improve efficiency of processes. We strive continuously to give the best value to our customers.

# Insight

## Extensive expertise

Working in partnership with our clients, we endeavor to provide for their requirements of competitive pricing, manufacturing quality and on-time delivery by applying our expertise across the collective facilities we have at our disposal, such as sheet metal processing, plastic injection moulding, die casting, woodworking, surface coating, soft luggage manufacturing and assembling, etc.

## Product development

Close interaction between Design engineers and experienced Tool Room professionals is the strength of our organization. We are known in the industry to be First-Time-Right in product development, and the team always gives us reasons to celebrate each time we take up, and deliver the challenges given by our clients.

## Testing and quality

Quality assurance is factored into every stage of our process, at every department, by every employee. Our adherence to ISO 9001:2000 parameters ensures rapid and continuous process improvements towards enhanced quality specifications.

## Our people

Qualified, well-trained and motivated people are the pulse of every manufacturing concern. Zenith is committed to continuously elevate the code of its people across all tiers towards excellence and efficiency, so that we may share in our collective success.

## Export history

Orders are regularly shipped across the world, keeping consistent on quality and time schedules. We appreciate the opportunity to deliver our products to the place of your requirement, in the packaging you specify.

## Corporate Social Responsibility

From what we get, we make a living. What we give, however, makes a life. We have been providing aid to children of the under privileged and maintaining parks in the neighbourhood.

# Clientele

The final evidence of our expertise does not lie in our quality certificates, nor our resourceful community, but rather in the confidence and loyalty of our patrons who, having experienced our excellent service and facilities, have chosen to remain with us year after year in partnerships that foster mutual growth and satisfaction.
